### Risk and Reward Profile

The Fund's rating on the risk and reward indicator was calculated using simulated historical data and therefore may not be a reliable indication of the future risk profile of the GBP share class. It should be noted that even the lowest category on the indicator does not mean risk free.

The rating shown is not guaranteed and may change over time.

#### Why is the Fund in this Category?

The Fund is in category 4 (Synthetic Risk and Reward Indicator - SRRI) as it invests primarily in international debt instruments, which, as an asset-class, tend to be subject to less volatility than other asset classes such as global equities. Volatility may result in gains or losses for the Fund. The Fund's risk and reward category accordingly reflects the historical volatility of investments held by the Fund.

#### Additional Risks

The Fund's risk and reward category may not capture all material risks to which the Fund may be subject, such as:

**Liquidity Risk** – This is the risk that investments held by the Fund may become hard to value or sell at a desired price, this may be because of causes such as extreme market conditions or because assets are listed on smaller stock exchanges.

**Credit Risk** – This is the risk that the issuer of a bond or other debt instrument experiences financial difficulty and subsequently defaults. Debt instruments that are subordinated or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated and/or unsubordinated securities.

**Use of FDIs** – The Fund may use FDIs for the purposes of efficient portfolio management. FDIs also involve risks that are different from, and in certain cases, greater than, the risk presented by more traditional investments.

**Currency Risk at Share Class Level** – The Sub-Fund is denominated in EUR. Shareholders investing in GBP Share Class should be aware that currency fluctuations between the base currency of the Sub-Fund and the Share Class might adversely affect the value of shareholders' investment. The Sub-Fund shall be employing a hedging strategy for Class G GBP Distributor Shares to hedge currency risk.

**Investing in CoCo bonds** – The fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

**Further information on risks may be found in the section entitled "Risk Factors" in the Fund's Prospectus (accessed as per Practical Information Section Below).**
